Peel-off *Pollution control* with activated charcoal

SHAKER MASK® is our new range of instantaneous & powder masks. In a few seconds, thanks to the cocktail shaker, the powder and the water unite in a mixed-flavour mask of fruits, plants or sweets.

4 different textures of SHAKER MASK® have been created: *Smoussy®*, *Creamy*, *Cristally* (transparent) and *Peel-off*.

A revolutionary concept, the ***Peel-off* Shaker Mask®** surprises by the **rapidity and the easiness of its preparation**. When mixed with water, the **preservative free charcoal grey powder** transforms instantaneously in a smooth cream which easily spreads on the skin and is easily peeled-off as well.

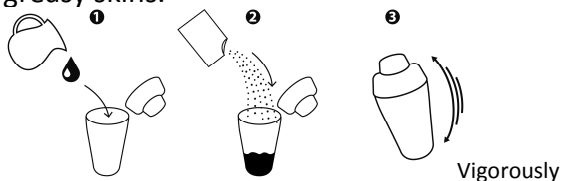

Peel-off pollution control protects the skin and sweeps away the pollution toxins thanks to the adsorbent power of the activated charcoal.

Strengthened barrier effect

The activated charcoal is the more natural decontamination agent which exists. Its main quality is its adsorbent power which allows it to retain impurities and toxins. It is associated in this mask with an anti-pollution complex composed with ivy, sunflower and ricebran; this complex acts especially against the cytotoxic effects of polluting smokes. The mask that creates acts also as a protective screen which strengthens the skin's barrier effect.

Detox activity

The activated coal is known for its detox capacity. It is able to remove the impurities and to sweep away the sebum excess: it is a precious active ingredient for treatments of mixed and greasy skins.

Pour 100g of water at 20°C in the shaker. Add the 25g powder sachet. Shake **VIGOROUSLY** during a few seconds until the mixing's « silence ». Apply immediately on the face avoiding the eyes' contour. Let it act around 10 minutes. Peel it off in one piece.

Packaging: one-dose 25g sachet advisable ; Use before 29 months
